Professional Profile

Creative Developer with four years of hands-on experience building interactive web applications using JavaScript, React, HTML and CSS. Experienced in responsive interface development, rapid prototyping and cross-browser testing, with a particular focus on usability and creating reliable experiences across devices.

Currently working within a creative technology studio, collaborating with designers and developers on digital projects from concept through to delivery. Alongside my studio role, I independently design, develop and launch web applications, including Grown on Trees, a daily browser-based puzzle game.

Core Skills

Creative Development	Technologies	Collaboration
• Interactive Prototyping • Responsive UI Development • UX & Usability Testing • Component-based architecture • AI-Assisted Development & Prototyping • VR/AR Testing & Deployment	• React, JavaScript, HTML, CSS • Vite, Sanity, Supabase • MapLibre, Git, GitHub • Netlify, Vercel, Directus • ChatGPT, Claude Code, Copilot	• Cross-Disciplinary Collaboration • Client Communication • Cross-Browser & Mobile Testing • Technical Documentation & Briefing • Iterative development

Selected Creative Projects

Grown on Trees - Independent Creative Development Project
React | Vite | JavaScript | Sanity CMS | MapLibre GL JS | Netlify

- Independently designed, developed and launched a daily browser-based puzzle game featuring interactive geography, word and logic challenges.
- Built reusable React components, gameplay mechanics, scoring systems and a Sanity CMS workflow for publishing daily content.
- Developed a fallback mapping system to maintain functionality when live maps fail, improving reliability across browsers and mobile devices.
- Implemented responsive interfaces, player analytics and shareable results, refining the experience through cross-device testing and user feedback.

Photo-Panic
React | Supabase | Real-Time Multiplayer

- Designed and developed a multiplayer photo party game with responsive host and player interfaces.
- Implemented realtime gameplay and iteratively improved mobile reliability, image handling and the player experience.

Professional Experience

Freelance Frontend Developer
Freelance Client: Channoil
June 2026 - July 2026

- Designed and developed a custom interactive map using HTML, CSS and JavaScript, deployed via Netlify and integrated into the client's existing website.
- Repurposed website content, implemented on-page SEO improvements and monitored performance using Google Analytics.
- Worked directly with the client to gather requirements, iterate on feedback and deliver the final solution.

Gamoola Ltd
Digital Operations Manager
February 2017 - Present

- Developed React-based campaign and outreach pages for integration with the company's WordPress website.
- Built interactive web prototypes and proof-of-concepts using React, JavaScript and Supabase to explore and validate project ideas.
- Supported VR/AR production through headset configuration, release channel management and hands-on application testing.
- Coordinated multidisciplinary teams of designers, developers and clients to deliver interactive digital projects from concept to launch.
- Produced technical specifications, proposals and project documentation, translating creative briefs into actionable development requirements.
- Managed production schedules, resources, budgets and delivery deadlines across studio projects.

Previous Experience

Brower Lewis PR
Account Manager
- Managed fashion and lifestyle client accounts, campaigns and events.
- Built long-term client relationships and produced media communications.

Giorgio Armani
Press Officer
- Managed media and stylist relationships while supporting international fashion events, including Milan Fashion Week.
